

# Andrew Kostyuk

Almaty, Kazakhstan

[andrew.kostyuk@gmail.com](mailto:andrew.kostyuk@gmail.com)

[linkedin.com/in/ankostyuk/en](https://linkedin.com/in/ankostyuk/en)

[github.com/ankostyuk](https://github.com/ankostyuk)

Have 15+ years experience of commercial development. Know the full cycle of software development from requirements analysis and design to task description to programmers, development and release of the product. Have a strategic vision of the product and an attention to details.

## Technical Skills

Development: Team and development management, Requirements analysis, Designing systems, UI, UX, SOA, OOP, TDD, Refactoring, i18n / L10n.

Programming languages: JavaScript, Java, Python.

Frontend: AngularJS, ExtJS, jQuery, Lodash, Raphaël, RequireJS, HTML, CSS, LESS, Bootstrap, Grunt, Browserify, Webpack, Adobe Photoshop.

Backend: Spring Framework, Apache Tomcat, Node.js, Express, PhantomJS.

Web: HTTP, REST, SOAP.

Data storage: PostgreSQL, MongoDB, Neo4j, Elasticsearch, Apache Solr.

Testing: Unit testing, Integration testing, Alpha/Beta testing, Mock, Mocha, Chai, JMeter.

VCS: Git, Mercurial.

Bug tracking: Redmine, GitHub, Jira.

OS: Mac OS X, Linux, bash.

## Experience

**Development Team Lead.  
Lead Developer. UI / UX  
Designer**

**BPC Banking Technologies**

Group of companies. [bpcbt.com](https://bpcbt.com)

March 2017 – Present

Development of SmartVista Integration Platform — a platform based on BPM Orchestrator for implementing business logic through internal and external services, for the integration of banking products and payment systems.

Design and implementation of the Platform UI and BPMN editor.

Development of the backend. Implementation of storage, search of parameters and logs of the transactions.

Analysis of business requirements. Designing the architecture of the platform. Code review. Technical interviews.

Development management.

Technologies: BPMN, JavaScript, ExtJS, Java, Elasticsearch, Logstash, Kibana.

## Software Developer

## Self-employed

November 2015 – Present

Participation in custom and open source projects...

### \* [LogicEditor](#)

Developed and implemented a [solution for automatic localization of applications and components](#) that are implemented in JavaScript, Lua, Handlebars.

Technologies: Abstract syntax tree, gettext, JavaScript, Node.js.

Designed and developed UI of B2B Passenger Service System for civil aviation, developed and implemented automatic UI localization.

Technologies: JavaScript, jQuery, HTML, CSS, LESS, Handlebars, Webpack, Node.js, gettext.

### \* [National Credit Bureau](#)

Support implemented projects for [National Credit Bureau](#) Economic Security Service. Design and develop software. Analyse business requirements and work out specifications.

Designed the support of [Self-employed information](#) and developed frontend.

Developed the algorithm for determining the historical connections based on the nondistinct data to support the history of relationships between companies and individuals for [Unisearch](#) and [The Analysis Of Affiliated Persons And Final Beneficiaries](#), developed frontend.

Designed service of "Search For Signs Of Conflict Of Interest" – multi-faceted verification of relationships between companies lists and individuals, [developed](#) frontend.

[Designed and developed](#) public API of companies and individuals relationships for the [National Credit Bureau](#) Economic Security Service.

Technologies: JavaScript, AngularJS, RequireJS, jQuery, Lodash, HTML, CSS, LESS, Bootstrap, HTTP, REST, Node.js, Express, PhantomJS, Grunt, Java, Spring Framework, Apache Solr, Apache Tomcat, MongoDB, Neo4j.

Managed the development and release of the [National Credit Bureau](#) products, held technical interviews.

## Lead Developer. CEO. Co-founder

## [nullpointer]

Outsourcing company. Moscow, Russia. [null-pointer.ru](#)

July 2012 – November 2015

Founded a company, specializing on software development. Arranged business relations with clients, planned a budget and managed projects. Designed and developed software. Analysed business requirements and worked out specifications. Formed a software development team, held technical interviews. Led software development team, consisting of 2-7 members.

Our team executed following projects...

### \* New products of [National Credit Bureau](#) Economic Security Service:

- [Unisearch](#). Search of the companies and individuals by the names, TIN, main state registration number, address, phone number. By means of this search you get the detailed information about companies and individuals and their relationships.
- [The Analysis Of Affiliated Persons And Final Beneficiaries](#). Information about relationships between companies and individuals being their owners and leaders, or having indirect coupling as relatives, purchasing participants or as persons related to other associated companies. Illustrative multi-tiered analysis of the property and corporate management structure, automated search of relationships and their graphical schemes construction, export of the schemes into various formats and publication.
- [Commenting System](#). Notes to companies analytics reports, comments tagging, file attaching and comments administration. Commentary widget can be placed on any page of the site.

These products attracted new clients and doubled [National Credit Bureau](#) volume of sales.

Promoted some of my ideas and product functionality proposals, managed the development and product release.

[Developed](#) the service of receiving information about companies and individuals from the internet resources.

Designed and developed UI and frontend of the [Unisearch](#).

Designed and developed UI and frontend of the [The Analysis Of Affiliated Persons And Final Beneficiaries](#) and developed the export of cloud diagram into PNG, PDF, DOCX.

Designed and developed UI and frontend of the Commenting System.

Created the presentation of "The Analysis Of Affiliated Persons And Final Beneficiaries" for the conference held by National Credit Bureau.

Technologies: JavaScript, AngularJS, RequireJS, jQuery, Lodash, Raphaël, jsPlumb, Backbone.js, HTML, CSS, LESS, Bootstrap, HTTP, REST, Node.js, Express, PhantomJS, Grunt, Java, Spring Framework, iText, docx4j, Freemarker, Apache Solr, Apache Tomcat, MongoDB, Neo4j, Adobe Photoshop.

\* Payment-related solutions for [Runet Business Systems](#): Integration processing, payment gateways and online payment systems, Mobile banking USSD payment application, Mobile banking application REST API design, Social network application for mobile account deposit.

Technologies: Java, XML, HTTP, Web Services, SOAP, USSD, JavaScript, jQuery, HTML, CSS.

\* Convergent Billing System for video monitoring system belonging to [Ivideon company](#).

Designed and developed API.

Technologies: HTTP, REST, Python, PostgreSQL.

\* Furniture online store [2x2 Mebel](#).

Developed frontend.

Technologies: Python, Django, PostgreSQL, REST, JavaScript, jQuery, HTML, CSS.

\* [Designed and developed i18n-packages](#) for localization. These packages are used for localization of frontend and backend of software solutions.

Technologies: gettext, Node.js, Grunt, RequireJS, JavaScript, Java.

\* [Designed and developed web application build helper](#).

Technologies: Node.js, Grunt, RequireJS, JavaScript.

## Java Developer

January 2011 – January 2013

## BPC Banking Technologies

Group of companies. [bpcbt.com](#)

Integrated [Aeroflot](#) ticket booking system with [Sberbank](#) payment gate.

Designed and developed Fraud Control – system of fraud probability determination, based on the payment data and rules of fraud probability determination. This system was implemented in [Sberbank](#) и [Alfabank](#).

Technologies: Java, SQL, XML, HTTP, Web Services, SOAP, Spring, Spring Security, iBatis, Hibernate, Mozilla Rhino, Jetty, Oracle Database, PostgreSQL, VAADIN, Freemarker.

## Frontend / Backend Developer. Co-founder

January 2010 – January 2011

## Bildika

B2C e-commerce startup. Moscow, Russia. [bildika.ru](#)

Organized startup from idea to product launch, [designed and developed](#) e-commerce system "Construction And Repair Goods Market Aimed On Customer Convenience".

Technologies: JavaScript, jQuery, HTML, CSS, Java, Spring, Spring Security, JSP, JSTL, Apache Tiles, iBatis, PostgreSQL, Apache Lucene, Apache Tomcat, SQL, XML.

## Lead Developer. Deputy Director

## INT Projects

Outsourcing company. Moscow, Russia.

May 2004 – January 2010

Designed and developed software. Analysed business requirements and developed worked out specifications. Formed a software development team, held technical interviews. Led software development team, consisting of 2-5 members.

\* Designed and developed UI and frontend of the following projects:

- Crude oil mining monitoring web application
- Web based document management system
- Web based system of the distance education
- Automated system of decision system support in transport logistics

Technologies: JavaScript, ExtJS, jQuery, HTML, CSS, Prof-UIS, C++, Win32 API, GIS.

\* Designed and developed SDK for coding-decoding of bi-dimensional barcode PDF417, SDK for recognition of machine-readable passport-visa documents for "The State System of Production, Execution, And Control Of Passport-Visa Documents Of New Generation".

Technologies: Java, Image processing, Artificial neural networks, Reed-Solomon codes.

\* Designed and developed Reporting System for "The State System of Production, Execution, And Control Of Passport-Visa Documents Of New Generation".

Technologies: Java, XML, XSL-T, XSL-FO, Apache FOP, JFreeChart.

## Research Scientist

May 2003 – October 2005

## Scientific-research Department of Moscow State Industrial University

University. Moscow, Russia. [mospolytech.ru](http://mospolytech.ru)

Was engaged in scientific research, wrote scientific-research articles and reports.

Developed firmware for the roughness automated measurement and parameter estimation, based on the three-dimensional analysis of the surface.

Got the patent #2004612670 "Program Control Of A Surface Analyzer".

Technologies: Java, C/C++, Electronics, Mechatronics, Signal processing, Fourier and wavelet transform.

## Software Developer

1996 – 2005

## Metrostroy, Moscow Joint-Stock Company "Likhachov Plant", Almazavtomatika

Developed estimate-analytical software for the internal use in a building organization.

Developed control and visualization UI of diamond cassette dispensing information system.

Developed programming and software technology skills.

Technologies: Assembler x86, C/C++.

# Education

Postgraduate specialization course "Automation of technological processes" of Moscow State Industrial University, 2003–2006

Applied mathematics and physics department of Moscow State Industrial University, 1995–2001

Engineer's degree, Automation of technological processes.
